VaccineFinder

December 1, 2020
VaccineFinder Role in COVID-19 Response

1. **Inventory reporting of COVID-19 vaccines** (*required*)
   - COVID-19 vaccination providers will report on-hand inventory supply daily to VaccineFinder.
   - Inventory quantities will not be made publicly available.

2. **Increase access to COVID-19 vaccines** (*optional, later phase*)
   - Providers may choose to make their location(s) visible on the public-facing website to increase access to vaccine once supply is available to the public.

*Note:* While the COVID-19 vaccine supply is limited, VaccineFinder will only be used for COVID-19 vaccine inventory reporting, not as a resource for the public to find vaccine at provider locations. The public-facing functionality will only be available when vaccine is more widely available.
VaccineFinder Onboarding

Jurisdictions collecting daily inventory from providers via existing platforms may enroll in VaccineFinder to report supply data.
Inventory Reporting Process

*Jurisdictions collecting daily inventory from providers via existing platforms may choose to report directly to VaccineFinder through the COVID Locating Health Provider Portal (batch upload)
